

# Joyful Noise Health Alerts

**Last updated: April 23, 2010**

Health alerts are intended to inform parents of infectious sicknesses that children in classrooms may be exposed to within a one week period (approximately). Please remember to refer to the Joyful Noise parent contract at <http://www.joyfulnoisekids.com/pdfs/parentcontract.pdf> for information regarding our sick policy.

As a general reminder, children are not allowed to attend school when exhibiting any of the following symptoms: fever, lethargy, excessive cough, diarrhea, vomiting or prior to antibiotic treatment with a doctor's notice for bacterial infections such as Conjunctivitis (pink eye), etc. Child may return when symptoms have not been present for 24 hours, and in the case of fever, when the fever has not been present for 24 hours without the use of fever reducing agents. When calling the school to report illness, please be specific in describing symptoms and when illness was identified.

Thank you for your help in keeping our school a healthy place!
